

Identify risks - demonstrate success

AGE READER^{mu}

❖ KILLER THEMES

- Heart attack risk
- Stroke risk
- Lipometabolic disorder
- Diabetes

❖ SIMPLE ANSWER IN 10 SECONDS

- Comfortable measurement on the forearm
- Immediate result display
- Small, portable device
- Used medically worldwide

Simple risk assessment
Excellent biomarker

Systems for the health conscious

Simple answers to killer topics

What is measured?

The AGE Reader uses the so-called AGEs (Advanced Glycation Endproducts) stored everywhere in the body. End products of sugar metabolism. At At-risk individuals accumulate AGEs as a A consequence of oxidative stress, with incipient or existing metabolic disorders or poor lifestyle and can be affected by the Body no longer sufficiently be broken down. AGEs accelerate the Cell ageing. They lead to vascular changes and deposits.

Overall, they play a decisive Role in the development of chronic Diseases such as diabetes, cardiovascular Suffering and kidney disease.

assigned to a risk level. The handy, equipped with a lithium-ion battery. The AGE Reader is portable and can thus be at changing locations without any effort Consumables will be used. not required.

What does the measurement mean for your services offered?

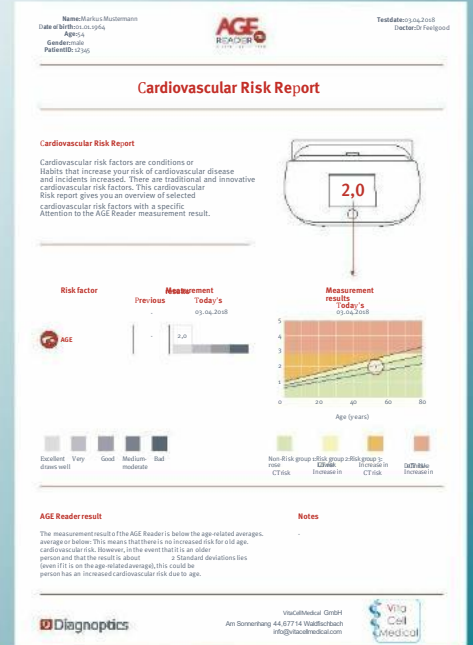

With the AGE Reader App you can read a impressively presented, slightly ver- The risk report is based on the the measured value and send it to your client. along with it. In this way you can reduce risks and Clearly document progress and give your Clients the directly measurable benefits of your Interventions planned or carried out

How is it measured?

The measurement finds by means of an optical procedure takes place on the skin of the forearm, which only briefly refers to the AGE Reader is applied. The measurement result is within a few seconds on the built-in colour display, with the standard value compared to a person of the same age and

before your eyes. Because an active life style, physical training, changing the Eating habits, weight reduction, close-up supplements, etc., can accelerate the degradation of AGEs and thus reduce the risk of Civilisation diseases clearly measurable decrease.
